

Town of Webster

New Hampshire

Map 4: Natural Services Network

Notes on Natural Services Network

For more information on the Natural Services Network please refer to the document "Natural Services Network: A Guide for Users" prepared by the Jordan Institute and New Hampshire Audubon.

Water Supply Lands include highly transmissive aquifers identified by the US Geological Survey and favorable gravel well sites identified by the NH Department of Environmental Services.

Flood Storage Areas include 100-year floodplains identified by FEMA and lacustrine, riverine and palustrine wetlands identified by the USFWS National Wetlands Inventory.

Productive Soils include prime farmland and farmland of statewide importance identified by the Natural Resource Conservation Service.

Important Wildlife Habitat includes habitat of statewide priority and habitat of ecoregional priority identified by the NH Fish & Game Department Wildlife Action Plan.
