

Energy Committee
Meeting Notes
December 10, 2014

Members in Attendance: Chairman Marty Bender, Selectman Bruce Johnson, Jere Buckley, Dee Blake. Others in attendance: Ray Scott, Pillsbury Lake Water District Commissioner, and Tricia Ilacqua, possible member.

Town Hall Inside Storm Windows – Marty looked into this. Does not appear to be a viable option to pursue at this time.

Net Metering – Marty has been in contact with James Hasselbeck from Revision Energy. The Town of Webster needs to use 50 to 60kw hours of electricity in order to make this worthwhile. Marty will ask for a presentation on net metering systems with sites at the safety building, elementary school, and Pillsbury Lake. Marty will double check Town usage, Dee will check school usage, and Ray will check Pillsbury Lake usage. Bruce will inform the Select Board, create a possible warrant article for Town meeting, and double check with legal services.

Next Meeting – The next Energy Committee meeting will be on Wednesday, January 21, 2015, at 6:30, at the Town Hall Select Board office. Please note that this is a week later than the usual second Wednesday of the month. Agenda items to include continuing to look into net metering options.
